# About the FTX Foundation

The FTX Foundation is a philanthropic collective that aims to find and support the most effective solutions to the world's most pressing problems. We make grants and investments to improve global health, prevent pandemics, reduce animal suffering, protect the climate and improve humanity's prospects of long-term survival and flourishing.

The majority of the Foundation's funding is provided by Sam Bankman-Fried and other senior principals at FTX. FTX users and employees also support the Foundation's activities, through the FTX Giving program, by contributing to FTX Philanthropy Inc., a non-profit organization organized for tax-exempt purposes.

MEET THE TEAM

## LEADERSHIP

## Sam Bankman-Fried

FOUNDER

Sam Bankman-Fried is the founder of the cryptocurrency exchange FTX.

Sam has been drawn to the philosophy of effective altruism for much of his life, donating to charitable interventions that focus on pandemic preparedness and biosecurity, global poverty mitigation, climate change, reducing animal suffering, voter registration, and artificial intelligence safety, among other issues. He believes in doing as much good as possible and plans to donate the great majority of his fortune to effective organizations and causes.

## Nick Beckstead

CEO

Nick Beckstead is the CEO of the FTX Foundation.

Nick has been working as a grantmaker and researcher in the effective altruism community since 2009. Prior to joining the team, Nick was an early employee at Open Philanthropy, where he worked for 7 years. Before that, he was a Research Fellow at the Future of Humanity Institute at Oxford University, completed a Ph.D. in moral philosophy at Rutgers University, and helped launch the Centre for Effective Altruism.

## BOARD

## Caroline Ellison

Caroline Ellison is the co-CEO of Alameda Research, a cryptocurrency trading firm.

Before joining Alameda in 2018, Caroline worked at Jane Street as a trader on the equities desk. She's been involved in the effective altruism community since college and started working in finance with the goal of earning money to donate to good causes.

## Gary Wang

Gary Wang is the CTO of FTX.

Prior to founding FTX, Gary was a software engineer at Google, where he built systems to aggregate prices across millions of flights, decreasing latency and memory usage by over 50%. He graduated from MIT with a degree in Mathematics with Computer Science.

## Nishad Singh

Nishad Singh is Director of Engineering at FTX.

Nishad was previously a software engineer at Facebook, where he worked on applied machine learning. He graduated summa cum laude from the University of California at Berkeley. Nishad has been involved with the effective altruism community since college and is committed to doing as much good as possible with his time and resources.

## **EXHIBIT 2**

# The FTX Foundation works to save lives, prevent suffering, and build a flourishing future.

The FTX Foundation is a philanthropic collective. We make grants and investments to improve global health, prevent pandemics, reduce animal suffering, protect the climate and improve humanity's prospects of long-term survival and flourishing.

We are funded principally by Sam Bankman-Fried and other senior principals at FTX. Our charitable activities are also supported by FTX users and employees, who make contributions to FTX Philanthropy Inc., a non-profit organization, through the [FTX Giving](#) program.

[LEARN MORE](#)

Effective philanthropy can save millions of lives and leave a brighter future to generations of our descendants. It's a privilege to be part of the effort to create a better world.

**Sam Bankman-Fried** Founder

## Our Grantees and Partners

Working with our grantees and partners, we seek to address the world's most pressing problems with the most effective solutions we can find.

## **EXHIBIT 6**

## Building a resilient health system

Oxygen is still in short supply in many places. Join our efforts as we build a National Oxygen Grid to ensure a reliable supply of medical oxygen across India.

### OxygenForIndia Announces New Partners – Swasth Alliance and Indiaspora

OxygenForIndia (OFI), a volunteer-run campaign to deliver medical oxygen in response to the COVID-19 second wave in India, recently welcomed on board new partners - Swasth Alliance and Indiaspora to assist in its effort to form a National Oxygen Grid.

### Dr. Indu Bhushan to co-lead OFI's National Oxygen Grid initiative

OxygenForIndia (OFI), a volunteer-run campaign to deliver medical oxygen in response to the COVID-19 second wave in India announced that Dr. Indu Bhushan will co-lead its effort to form a national oxygen grid.

## About us

The OxygenForIndia initiative came into being in the wake of the unprecedented oxygen crisis in April 2021, with a vision to ensure that no one in India dies due to the lack of medical oxygen. In the short term, we deployed 20,000 reusable oxygen cylinders and 3,000 oxygen concentrators in 57 urban and rural centers across India. Meanwhile, we are working with partners to establish a stable, reliable oxygen supply system for India for the long term.

## Strengthening Resilience

Improving access to facilities. →

Dear OxygenIndia

Subject: Letter of Appreciation

This is our profound appreciation for providing an escape of national crisis.

During the 2nd wave second time due to your stock of oxygen tanks to our centre.

We used the concentrators where our Patients also received a full recovery.

We, MDM Forging OxygenIndia by

Warm Regards,

AGM - Corporate

Warm regards  
Rtn. Tyagaraj  
President

Reg No. : PL/994/2014

**NO FOOD WASTE**

Date: 11<sup>th</sup> October 2021

From,  
M.Dinesh,  
Co-Founder & Executive Director,  
No Food Waste,  
Coimbatore, Tamilnadu.

Dear OxygenIndia Team,

Subject: Appreciation of Oxygen Service for COVID

No Food Waste is a non-for-profit organization working on surplus food recovery, hunger alleviation, emergency food assistance, nutritional development activities etc.

No Food Waste has been working on various solutions to address the above-mentioned problems including connecting untouched edible surplus food from various bulk food sources such as wedding halls, restaurants, corporate canteens with needy and hungry people. During COVID-19, No Food Waste has carried out several relief activities for helping the needy and deserving people.

In the middle of the 2<sup>nd</sup> wave of COVID the most difficult item to source was Oxygen, we tried our best to source locally and otherwise but couldn't find many ready and reliable options. We heard about OxygenIndia and approached you for sourcing concentrators to carry out our service. You provided oxygen concentrators and cylinders at minimal charges to enable organisations like us to carry out oxygen service.

We have taken 12 concentrators against payment of refundable deposit from OxygenIndia. We were very happy with the quality of equipment and effort to ensure we get the equipment quickly despite many restrictions during COVID wave. We have done a partial return of equipment as some patients continue use concentrators. For all equipment returned we have got refund of deposit minus charges as agreed in contract.

We thank the OxygenIndia team for their service and effort in enabling us to perform Oxygen service to communities in Coimbatore and surrounding areas.

Warm Regards  
For NO FOOD WASTE  
M.Dinesh  
EXECUTIVE DIRECTOR

M.Dinesh,  
Co-Founder & Executive Director, No Food Waste.

Mail : nofoodwaste.in@gmail.com Visit : www.nofoodwaste.in Help Line : 90877 90877

*" Your service of providing concentrators against a fully refundable deposit, transporting to our centre at very minimal charges was hard to believe at first. However, when your team got the concentrators delivered to us despite COVID restrictions, we were extremely happy. "*

### **Rotary Club of Salem Metropolis**

[VIEW IMPACT](#)

OxygenForIndia was founded in April 2021 with the goal to avert deaths from the lack of oxygen in the country. Deploying reusable oxygen cylinders and concentrators across the country, OxygenForIndia has successfully provided medical oxygen to major cities and rural districts, saving countless lives.

Our journey is just beginning. OxygenForIndia is working toward establishing a national oxygen grid in the country to prevent a crisis like this in the future.

**Our mission is to ensure that no one in India dies from the lack of medical oxygen.**

## The pandemic exposed critical gaps in access to medical oxygen

The lack of access to medical oxygen has preceded the pandemic and will continue to threaten lives if we don't act now. OFI is working to establish a National Oxygen Grid. Help us reach the goal of averting preventable deaths.

# Mission & History

We believe communities are the unit of change to realize improved life outcomes for boys and young men of color. Research shows that the collective work of community leaders, members, and public and private agencies pursuing the same goals for boys and young men of color can lead to sustainable, place-based change.

# Our History

President Obama launched the My Brother's Keeper program in February 2014, in response to the death of Trayvon Martin. The program sought to address the persistent opportunity gaps boys and young men of color face and to ensure all young people can reach their full potential.

We believe communities are the unit of change to realize improved life outcomes for boys and young men of color. Research shows that the collective work of community leaders, members, and public and private agencies pursuing the same goals for boys and young men of color can lead to sustainable, place-based change.

## **My Brother's Keeper Alliance at the Obama Foundation**

In 2018, 19 organizations across 10 states and Puerto Rico were chosen as national models to expand evidence-based initiatives to reduce youth violence, grow effective mentorship programs, and measurably improve the lives of boys and young men of color. The MBK Alliance team is working with these Impact and Seed communities to support the development of long-term strategic plans that chart life outcomes changes for boys and young men of color across the six milestones.

The Alliance is working with partners to offer tools, resources, and convening opportunities designed to support the growing network of nearly 250 MBK Communities that participated in the My Brother's Keeper Community Challenge.

Our goal is to bolster the network of MBK Communities and all those that share our mission while promoting action, strengthening interventions, and sharing practices and policies that work.

## **Our approach**

MBK Alliance works to unleash the power of communities working together to solve problems for boys and young men of color, at a level to improve real life outcomes. We believe communities are the unit of change to realize improved life outcomes for boys and young men of color. Research shows that collective work of community leaders, members, and public and private agencies pursuing the same goals for boys and young men of color can lead to sustainable, place-based change.

We believe that cross-sector collaborative action is central to how communities will achieve improved outcomes for boys and young men of color.

---

## Local leaders

Local leaders champion efforts across departments to shift policies and improve outcomes for boys and young men of color.

---

## Nonprofits

Nonprofits are healthy and increasing scale of high-quality service offerings directed towards boys and young men of color from cradle to career.

---

## Corporations

Corporations commit resources to support boys and young men of color and create targeted hiring and retention strategies

---

## Philanthropy

Philanthropy commits sustained financial resources to support boys and young men of color.

---

## Residents

Residents (e.g., YOUTH) are engaged and commit time and their voices to shape priorities and initiatives.

## By the Numbers

My Brother's Keeper is 100% privately funded. Because we are a Christian community serving in Christ's name, we do not accept any local, state, or federal funding. And unlike many charities, no donated items are ever sold — the best we have goes directly to those we serve.

## **EXHIBIT 10**

EXPLORE THE PLATFORM

We believe that technology can unleash the full potential of natural systems to address climate change and protect life on earth.

JOIN US

## Our statement of intent

Now is the moment to reimagine the relationship between business and nature. To harness technology to shift our perspective and restore integrity and confidence in nature.

It's time to see carbon in action.

## Our story

### ORIGINS

#### ▼ **Inspired by the Amazon, born in the Redwoods**

Pachama's founders were born and raised in South America where they witnessed the devastating deforestation of the mighty Amazon rainforest, prompting them to action. As technologists, they moved to Silicon Valley and, from a cabin in the mighty Redwood forests, Pachama was born to bridge accelerating technologies with the urgent need for conservation and restoration funding to address climate change and biodiversity loss.

## GROWTH

## Restoring millions of hectares

Pachama's mission swiftly attracted talented engineers, scientists and investors from around the world, who felt called to invest their time and money in the cause. In the subsequent years, Pachama helped fund projects that restored more than 10K hectares and conserved more than 2M hectares of native forest around the world, equipping dozens of Fortune 500 companies with the insights needed to confidently invest in nature. Today, Pachama continues to advance its technology platform and ecosystem to catalyze a new generation of nature-based carbon projects, helping carbon markets evolve.

## FUTURE

## Cultivating a natural renaissance

We envision a world in which a flourishing nature, new technologies and human collaboration unite our economies and our ecologies. Where businesses have an inherent positive impact on the Earth's biosphere and atmosphere, of which they are a part. Pachama is committed to continue investing with conviction in the innovations needed to restore nature at climate scale, helping businesses invest in nature with trust.

# The FTX Foundation Group Launches the FTX Climate Program

FTX Climate program includes carbon neutral initiatives, research funding, special projects, and carbon removal solutions

---

NEWS PROVIDED BY

**FTX Trading Ltd. →**

27 Jul, 2021, 13:00 ET

---

ANTIGUA, July 27, 2021 /PRNewswire/ -- The FTX Foundation Group, a collective group consisting of companies owned by Sam Bankman-Fried and related contributors ("FTX Foundation"), today announced the launch of the FTX Climate program.

This global initiative is the first major program launched by the FTX Foundation and is centered around four ambitious goals: 1) meeting FTX Trading Limited's ("FTX") commitment to becoming carbon neutral this year, 2) funding research and policy initiatives that will have an outsized impact on the climate crisis, 3) supporting the growth of carbon removal solutions and 4) funding other climate related special projects.

FTX CEO Sam Bankman-Fried commented on today's news, "FTX Climate is an important step for us in leaving the planet in a better place than it is today. We consider ourselves lucky to live in the world as we do, and we feel a responsibility to make sure future generations get to experience it as well. When we announced our commitment to

becoming carbon neutral. In May, we said we were going to do this right and find a holistic and impactful way to address climate change. This is just the first of many programs we plan to undertake in order to effectively support organizations trying to save our planet."

### **Carbon Neutrality**

FTX & the FTX Foundation publicly committed to spending a minimum of \$1 million this year to offset the environmental impact of cryptocurrency mining and storage. As a result, the FTX Climate program has already purchased over \$1 million (or 100,000 tons) in carbon offsets through two organizations, BurnStoves and Pachama:

- BurnStoves created an inexpensive and environmentally friendly stove for African countries. The sale of 7,000 VER carbon credits will allow BurnStoves to increase scale and reduce the cost of the stoves they produce.
- Pachama allows corporations to buy forest based carbon offsets from projects around the world. FTX Climate has purchased 93,000 carbon credits to support the Kootznoowoo project in Alaska, Bajo Calima y Bahía Málaga project in Colombia, and the Nicaforest project in Nicaragua.

### **Research & Policy Funding**

FTX Climate is dedicated to furthering research on how best to solve the climate crisis and how public policy can be shaped to effect change. In support of that, FTX Climate has committed over \$500,000 combined to three organizations working on research and policy initiatives relating to climate change: Giving Green, CarbonPlan, and the Good Food Institute.

Further information on these organizations and the commitments made to them can be found on the Research & Policy page of the FTX Climate website.

### **Carbon Removal**

Another key area of focus for FTX Climate will be Carbon Removal, with the program committing \$1,000,000 to permanent carbon capture and storage. While there have been great strides made in terms of renewable energy, Carbon Removal looks to mitigate and hopefully reverse the impacts of climate change that we're already seeing by extracting carbon dioxide from the atmosphere and storing it permanently. While no solutions exist currently to conduct carbon removal at a globally relevant scale for a feasible cost, the \$1 million committed by the FTX Climate program is being set aside to work with the organizations looking to make this into a globally effective solution.

### **Special Projects**

As its first special project, FTX Climate has also made a three-year commitment to The Honnold Foundation to install solar panels in the places they are needed the most. This year, FTX has committed \$50,000 to help complete the current joint effort between the Honnold Foundation and the Ceibo Alliance with an additional \$100,000 per year to be committed in 2022 & 2023 in order to fully fund two new solar panel projects in the Amazon.

The FTX Foundation is centered around the FTX team's desire to live in a world where everyone has the same opportunities. With the pledge of one percent of all net fees going towards charitable giving, the FTX Foundation manages and disperses these funds to the most effective organizations around the world. The FTX Foundation has already earmarked more than \$10 million for charity this year with more than 3 million dollars already donated to support a variety of charities including those addressing the recent flooding in the Henan Province in China and the oxygen crisis in India.
